

# Chesil Exchange (O Gauge 7mm=1ft)

Chris Towers (Bradford MRC)

A Typical Colonel Stephens light railway, small station/goods yard, portrayed in O gauge  
Originally built by Mike Hayward but now owned and enhanced by Chris Towers.  
Despite being O scale it uses OO rail hand built onto copperclad sleepers to portray its light railway nature.  
The layout normally runs with a Southern theme but may portray a much wider area and times.  
Control is conventional with points and signals being worked by solenoid motors.

Stock is a mix of kit built including Slaters, Springside and proprietary from Dapol and Ixion ready to run., Buildings are constructed from foam board with Various cladding materials.
